

ROLLER COLLECTION 2022

4.0

Why Edea skates are so special

We think differently, we start with the skater and design for performance. Edea means...

Greater Feel

Roller skating is all about performance. Performance is all about feel. Feel starts with the boots. Edeas have designed boots for performance. Feel the edges.

Innovation

Skaters push the boundaries demanding more. Edea skates are designed with innovation throughout to give better feel and control, giving skaters the confidence to perform.

Comfort

Skaters demand performance and comfort. Edea have created this impossible blend with an anatomical shell and memory foam that support without pressure. Feel the hug.

Fully ventilated

Fully ventilated on the sole with extra ventilation on the upper. This maximizes airflow keeping the foot fresher. Be cooler with Edea.

Lightweight

Lighter means better feel and quicker transitions. Lighter means acceleration and control. Edea think light, Edea design light, Edea are lightweight skating performance.

Faster to perform

Designed with hi-tech materials to reduce break-in time. Technicians can adjust the boots in store for an instant custom fit. Edea, designed to fit and be fitted more quickly.

Sharper style

Skating is a sport about expression, where art meets performance. It is technique and style. Style is what Italians do. Edea designed for superior performance. Step into the rink ahead of your rivals.

NEW PROFILE

The new profile reduces friction and increases the feel of being on skates. The rotation point moved forward and the taller rocker combine to create the perfect training partner.

TAKE OFF JUMPS BANDS

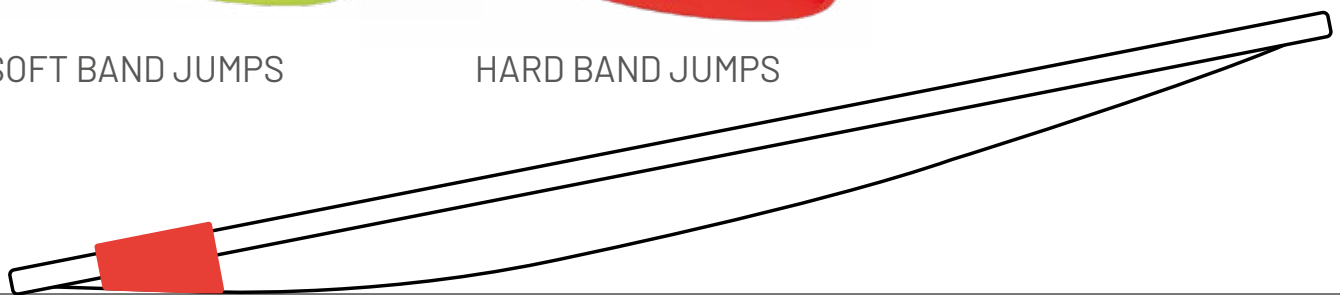

The special bands are to practice take offs. Two bands are included, a softer yellow one for singles and the red for doubles or triples. NOTE: Use without bands for spin practice.

SOFT BAND JUMPS

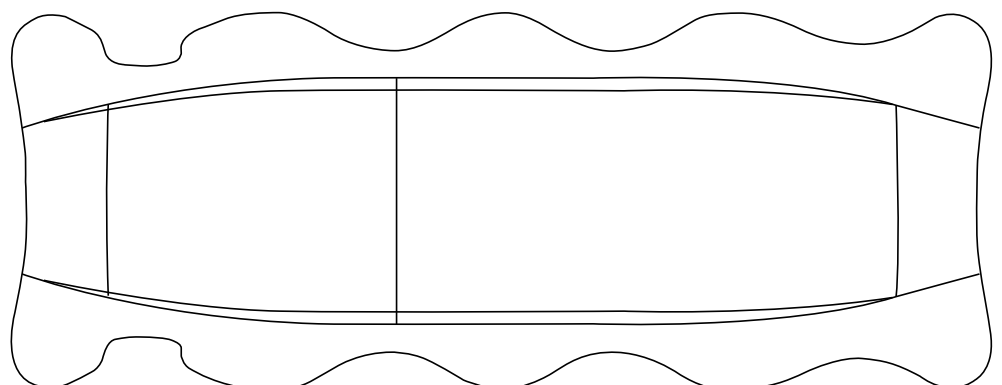

HARD BAND JUMPS

GRIP

THE NEW WAVE DESIGN

Makes it easier to practise as the platform is wider.

Size: 225 – 310

SKATING IS CONSTANTLY SENDING SHOCKWAVES THROUGHOUT YOUR BODY. IMPACT AND VIBRATION CAUSE WEAR AND TEAR INJURIES INCLUDING TENDINITIS, OSTEITIS AND MICRO FRACTURES TO NAME BUT THREE. VIBRATIONS CAN CAUSE MUSCLES TO WORK AGAINST THEIR NATURAL DYNAMIC MOVEMENT. INTENSIVE TRAINING CAN THEREFORE MEAN PAIN THROUGHOUT YOUR BODY, ESPECIALLY IN THE JOINTS, THE LEGS AND IN THE BACK.

EDEA ANTISHOCK UNDERSOLE BY NOENE CHANGES THE GAME. SPECIFICALLY ENGINEERED USING A VIBRO-ABSORBENT MATERIAL FROM SWITZERLAND, THIS UNDERSOLE ABSORBS AND DISPERSES 92% OF THESE HARMFUL SHOCKWAVES.

how to use

1. choose the correct size by matching your boot size
2. place undersole under your orthotic or supplied footbed
3. line up ventilation holes for maximum ventilation

LOVE YOUR BOOT

CARING FOR AND CLEANING THE UNDERSOLE HELPS PROLONG ITS LIFE AND KEEPS YOUR FEET FEELING FRESH - AND WHAT'S MORE IT IS VERY EASY. SIMPLY REMOVE AND WIPE WITH A WARM SOAPY SPONGE. WIPE OFF WITH A TOWEL AND LEAVE TO DRY BEFORE REPLACING IN THE BOOT.

ANTI-SHOCK SKATE UNDERSOLE

LESS PAIN MORE GAIN

Edea antishock undersole by Noene is specifically designed to improve skating by reducing impact shock and so improve performance.

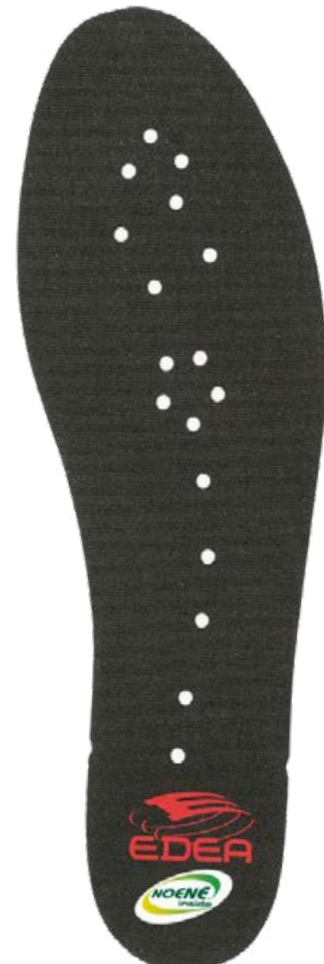

Noene is scientifically proven to reduce shock and impact by redirecting and dispersing the energy. Our 1mm layer provides optimal performance benefit and maximum comfort while being lightweight and ventilated.

- reduces fatigue
- reduces impact shock
- reduces injury risk

maximise your performance

ODOR ABSORBERS

Our innovation makes us better and different. We need to be sized, fitted, shaped, laced and mounted in the Edea way.

Sizing

THE PERFECT SIZE

In order to get the correct length you need to use the Edea measuring device.

THE PERFECT FIT

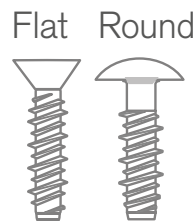

90% of feet fit our C or standard width. Edea stretchers make the final adjustment to give the perfect custom fit. Non-standard widths are available on special request (B-narrow; D-wide; E-extrawide).

Mounting

EDEA boots have thinner technical soles and need special tools and hi-low screws for mounting the blade.

SET OF 100 HI-LOW SCREWS

Edea hi-lo screws are dual helix to increase hold. Do not use any other screw.

ONE DRILL BIT EXTENSION 2,5 MM.

Specially measured drill bit holder ensures accurate depth of holes. 2,5mm drill bits are used for EDEA Hi-Low screws.

PRE-CUT FILLERS

Essential for repositioning blades. Each pack includes 25x2,5mm pre-cut carbon bars.

Mounting

Edea innovative soles are not only thinner but flat, so you can choose traditional mounting, QUICK MOUNTING or a combination of both. Edea boot can fit any frame more easily and more quickly.

Stands for quick and precise frame mounting are practical and portable for dealers.

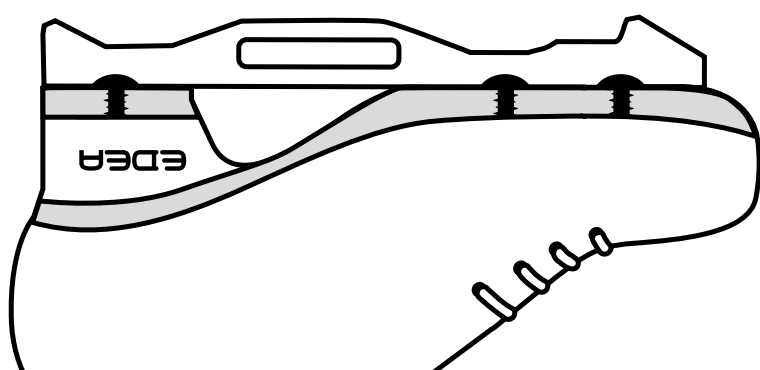

SPECIALIST KIT

manual mounting stand
+drill bit
+Hi-low screws
+carbon filler
+apron

PROFESSIONAL KIT

pneumatic mounting stand
+drill bit
+Hi-low screws
+carbon filler
+apron

QUICK MOUNTING means

- . you attach the frame from the outside much easier, more accurate and less time consuming
- . the flat sole means no wedges and no awkward drilling

As product has continuous improvements, we reserve the right to change the design without notice.
